

# Memory Lab

## Video8/Hi8 Instructions

### Step 1:

The Sony Video8/Hi8 player will play all Video8, Hi8, and Digital8 tapes. All cassettes require inspection to ensure compatibility and condition.

To start digitizing, turn on the player by sliding the power switch at the top right.

### Step 2:

Slide the eject switch on the bottom right to open the player. Insert the tape being digitized into the player. All tapes must be facing with the lettering facing upward and the exposed tape side towards the player. Once fully inserted, push the player closed.

After inserting the tape, press play or rewind to ensure starting at the beginning of the tape.

### Step 3:

Once the tape begins to play, the video will be displayed on the large television. If it is satisfactory, press the record button on the ClearClick HD Capture Box. When finished recording, press the record button again.

When recording, the green light will flash and when not recording, it will be solid green.

After finishing scanning, please ask at the circulation desk for help with file transfer.
